Professional Summary

Cybersecurity Engineering student and Full-Stack Developer with hands-on experience architecting and deploying production-style MERN stack applications (React, Node.js, Express, MongoDB). Proven track record of shipping end-to-end web applications under tight hackathon timelines. Skilled in RESTful API design, interactive 3D/geospatial frontend development, and secure software development lifecycles across Java, Python, C, SQL, and Web Security fundamentals.

Technical Skills

- **Languages:** Java, Python, C, JavaScript (ES6+), SQL
- **Frontend Development:** React.js (Vite), HTML5, CSS3, Tailwind CSS, Leaflet.js, Recharts, Three.js
- **Backend & Databases:** Node.js, Express.js, RESTful APIs, MongoDB, Relational Databases (SQL)
- **Developer Tools:** Git, GitHub, Postman, VS Code, Rapid Prototyping, Debugging
- **Cybersecurity:** Application Security Fundamentals, Secure Coding Practices, Vulnerability Assessment

Featured Projects

AquaTrace – North Bangalore Groundwater Intelligence System | *MERN Stack, Leaflet.js, Recharts*

- **Engineered a full-stack geospatial application** monitoring groundwater levels across 12 zones in North Bangalore by synthesizing GRACE satellite data and simulated IoT sensor streams.
- **Architected and deployed 9 RESTful API endpoints** (Node.js/Express) handling satellite time-series analysis, rainfall metrics, and recharge-zone identification.
- **Developed interactive mapping & analytics dashboards** (Leaflet.js/Recharts) visualizing water-table depth across 6 critical severity thresholds.
- **Integrated an algorithmic recommendation engine** to evaluate zone metrics and generate automated site-specific interventions (percolation ponds, recharge shafts).

PitchVision 3D – Cricket Pitch Analysis Platform | *MERN Stack, Three.js*

- **Built an interactive 3D terrain visualization system** using Three.js to render uploaded pitch images for spatial surface inspection.
- **Developed an Express.js automated analysis backend** to assess pitch moisture, grass coverage, surface hardness, and crack propagation patterns.
- **Implemented predictive match-strategy logic** calculating toss recommendations, pace/spin advantage scores, and session-by-session forecasts.
- **Designed a searchable MongoDB report repository** for venue-level historical pitch analysis lookups.

Education

Bachelor of Engineering (B.E.) in Cybersecurity Engineering

Cambridge Institute of Technology — North Campus

Bengaluru, Karnataka

CGPA: 8.66 / 10.0 upto 4th sem

Pre-University Course (PUC)

Vishwa Prajna PU College

Mysuru, Karnataka

Certifications

- Java with Data Structures & Algorithms (DSA) | Full-Stack MERN Development
- Relational Databases & SQL Mastery | Cybersecurity Fundamentals & Secure Software Design

Additional Information

- **Languages:** English (Professional), Kannada (Native), Hindi (Conversational)
- **Extracurriculars:** Active Hackathon Participant (Cross-functional team lead for frontend & API architecture).
